So Meagawa Dokoku no Kami

Sir-

In compliance with your request
I have made some enquiries into
the cost of building a steam launch
for the "Pharos"

It seems we have sufficient
spare wood in the yard for the purpose
therefore no wood requires to be bought
Carpenter's wages will cost about
100 rios -
Copper & brass work about 100
rios -
Masts & other furnishings about 50
rios -

Engine &c. as before explained 1500
rios

Left to
Meyers
about 1800
Came

I do not think this estimate
will be exceeded - The total
of which is 4750 Pios

I am
Yours Truly
W. D. Mayhew
