

889
July 27, 1875.

His Excellency

Mr. Okuma

Sir: It is reported that the total production of Gold and Silver of the Pacific States of North America during the year 1874 amounted to eighty five millions of dollars.

There recently have been discovered in the State of Nevada, United States, immense mines of Silver and it is not improbable that it will have the effect to lower the price of this precious metal.

Very Respectfully
Geo. S. Williams
